

# Kneetilt Mechanism

L12

Product No. 15-400-02

Kneetilt mechanism with 7 positive locking positions. All functions are controlled from a single lever. A push button controls the back tilt and anti-shock features. Twisting the lever controls height adjustment. A knob on the bottom controls spring tension of tilt function. Rugged all steel construction. Complies with BIFMA X5.1-2002 testing requirements.
