

Foot Ring With Internal Lock^{I1}

The 360 degree compression fitting makes the **internal locking** foot ring the most slip resistant foot ring in the industry.

Continuous contact within the hub prevents standpipe deformation caused by over tightening the knob on regular foot rings.

Foot ring is loosened and tightened by turning the outer ring.

Patented Internal Lock

Fits on all standpipe diameters (49.7 mm, 50 mm, 50.8mm).

Exceeds ANSI BIFMA X5.1-2002 testing.

Available in 3 versions: all steel, aluminum spoke and all plastic.

Outer diameter available in both 18 inch and 20 inch.

Outer rings available in both round and oval.

Patented in Asia and North America.

Distributed in North America exclusively by Hunt Country Components, LTD.
